

Week 4: Functions**Web Programming Fundamentals: WDD 144****Bare Minimum Requirements**

These requirements must be satisfied before any points are awarded. Failing to meet these requirements will result in a zero (0) grade.

1. Working JavaScript file with no major syntax errors.
2. HTML file with working script link to the JS file.

Topic	%	Excellent (100%)	Good (75%)	Fair (30%)	Poor (0%)
Programming Fundamentals					
Industry Example	15	Function created has appropriate parameters, returns the appropriate value and is correctly and elegantly written.	Function's parameters or return type require some tweaks or minor edits are required to make it work.	Function is missing required elements or major editing is required to make it work.	Function is barely formed or absent. Missing essential elements to make it work.
Personal Example	15	Function created has appropriate parameters, returns the appropriate value and is correctly and elegantly written.	Function's parameters or return type require some tweaks or minor edits are required to make it work.	Function is missing required elements or major editing is required to make it work.	Function is barely formed or absent. Missing essential elements to make it work.
Wacky Example	15	Function created has appropriate parameters, returns the appropriate value and is correctly and elegantly written.	Function's parameters or return type require some tweaks or minor edits are required to make it work.	Function is missing required elements or major editing is required to make it work.	Function is barely formed or absent. Missing essential elements to make it work.
Ternary	5	A ternary is used in at least one example.		A ternary is not used in any example.	
Else If	5	An Else If Conditional is used in at least one example.		An Else If Conditional is not used in any example.	
Anonymous Function	5	A anonymous function is used in at least one example.		A anonymous function is not used in any example.	
3 Parameters	5	At least one of the examples contains a function that has 3 parameters.		None of the examples contains a function that has 3 parameters.	
Logic Operator	5	A logical operator is used in at least one example.		A logical operator is not used in at least one example.	
Technical					
GitHub Delivery	10	Files are available on GitHub, visible to the instructor, and in an easily-discoverable location, and include at least 20 meaningful commits.	Files are on GitHub, but not visible to the instructor or hard to find, or fewer than 20 commits.		Files are not on GitHub.
Files	10	File structure is as specified and student name and date is present in all work.	Missing student name or date, or minor file structure issues.	Major file structure issues.	Files are a hot mess.
Professionalism					
Completeness	5	All required elements from the assignment are included.	One or two minor elements missing.	Major pieces missing.	Not even close to complete.
Investment	5	Presentation is well thought out, coherent, and includes personal relevance.		Presentation is impersonal or disconnected.	Little to no forethought, personalization, or relevance.
Your course Professionalism grade is affected by your Investment grade.
